

Products & Services

Rotational Molding

- Part sizes up to 4.1 meters (diagonally)
- Closed-loop IR feedback & RF process controls

5 axis CNC

Thermoforming

Thermoforming

- Maximum part size: 1641 X 1410 X 750mm
- 20 ton clamp pressure, twin sheet capable, matched tools & forming up to 400°C

Rotomolding

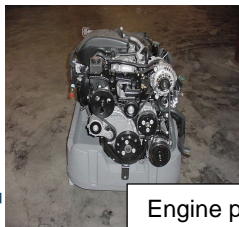

CNC Trimming

- Maximum part size: 2000 X 1600 X 750mm
- Up to 5-axis trim paths

Automotive custom WIP pallets and containers

Automotive: High temperature engine components with thermoplastic composites

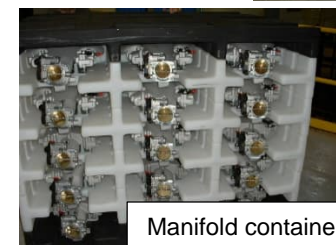

Engine pallets

PPS w carbon for under the hood

Differentiators

- Over 45 years experience
- High tolerance large parts
- All thermoplastic materials including high temperature thermoplastic composites
- Rotomolding and twin sheet heavy gage thermoforming
- custom design, simulation and testing capabilities
- Worldwide sales and tech support

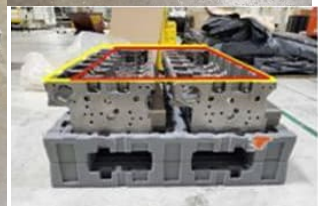

Manifold container

Compressor pallet

Cylinder head pallet

Small engine head pallet

Certifications &

Memberships

ISO 9001-2015 Certified

ITAR Compliant

AS9100D:2016

CMMC level 1; level 2 in progress

Veteran Owned Small Business

Association of Rotational Molders

Company Data

CAGE: 1YPB5

DUNS: 065545972

NAICS:

32521 326199 336992

326113 333993 333999

326121 326122

PSC:

2510 2540 2541 9330

- Products used in automotive, aerospace, and printing applications

Customers

- Cummins (Logistics Group, GPL, CEP, Mexico and Columbus)
- GM, Toyota, Honda
- A.M. General (Humvee)
- VW AG
- SAFRAN, Boeing, Lockheed Martin, NASA
- Heidelberger Druckmaschinen AG
- Koenig & Bauer AG
- Bobst

Core Capabilities & Specialties

- State of the art custom production equipment
- Reverse engineering capability
- Precision measuring with electronic measurement equipment, including laser scanning arm
- In-house test facilities
- Solidworks CAD design
- Solidcam tool path solutions.
- ABAQUS simulation
- 3D printing for scaled prototypes

Jeco Plastic Products, LLC

885 Andico Road
Plainfield, IN 46168
